

This is in reference to the State of Indiana telephone privacy proceeding number is 02-278. I am on the Indiana No-call list and have been since the first opportunity to sign up. I do not want to see any changes made to this law which would weaken its' purpose. Since the implementation of the law, I no longer have interruptions from unwanted calls during mealtime and family-time. Prior to this law I would have to clear my answering machine daily when I returned home from work and then had to constantly answer calls from persistent sales people. There was never a peaceful evening at home. Please re-consider making any changes to this law which would allow unsolicited calls to my home. Thank you.
